

ihelpTM max

*The most reliable and advanced
emergency medical device on the
market today.*

Circle of Care

We all want the best out of life. The iHelp Max offers peace of mind and security whether you are at home, or on the go. Live your best life.

Cloud Portal

Each iHelp Max is linked to our portal that confidentially and securely monitors activity. Trained operators will alert emergency services and the wearer's circle of care when help is needed.

Fall Detection*

When the iHelp Max senses a fall, a trained operator is automatically notified without the need to press a button.

Geo-Fencing

The iHelp Max has the ability to sense if the wearer has exited or entered a pre-determined "safe" zone and can notify their circle of care immediately.

* Emergency services will know the location of your iHelp Max and will be dispatched if necessary and will also contact your circle of care.

Features & Functions

Meet the **iHelp Max™ 4G**, the most reliable and advanced emergency medical device on the market today.

Reliable. Adaptable. Intelligent.
